DETAILED ACTION

Status of Claims

Claims 1-14 have been canceled.

Claims 15-20 remain pending.

Claims 15-20 are allowed.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for the examiner's amendments to the claims was given in a telephone interview with Mark A. Wilson #42709 on 7/7/2010. The application has been amended as follows:

15. (currently amended) A memory device comprising:

an interface for receiving access requests, the interface having an address output to an address path and a data output to a data path, wherein address information is carried on the address path and data for writing to memory or data read from memory is carried on the data path;

a memory cell array having a plurality of low-latency, rewritable, non-volatile memory cells forming at least one memory section;

a word-select unit connected in the data path and to the address path and between the interface and the memory cell array to provide column selection;

a section-select unit connected to the address path and between the interface and the memory cell array to provide row selection;

wherein both the word-select unit and the section-select unit select a respective column and row of the memory cell array in response to the address information;

a profile storage unit connected to said interface comprising a plurality of request profiles that each represent a profile of an access request, wherein each request profile includes:

a set of request information elements, wherein at least one of the request information elements indicates whether an access request is a read request or a write request; and

access flags whose state indicates whether a corresponding access request is allowed to access the memory or not allowed to access the memory, the access flags comprising write protect flags and read protect flags;

an access control unit connected to said profile storage unit and said memory and configured to allow or reject an access request;

wherein said profile storage unit selects an access flag that corresponds to a request profile in response to an access request that fits the request profile; and

wherein the access control unit allows or rejects an access request in response to the access flag that is selected by the profile storage unit and wherein a write request that violates a write access flag is ignored and a read request that violates a read

Deleted: an access flag

access flag results in a fixed answer and wherein a violation triggers an interrupt pin on the interface.

Allowable Subject Matter

The art of record neither teaches nor fairly suggests device of independent claim 15 including the following combination of limitations defining the main invention/embodiment:

" .. a plurality of request profiles that each represent a profile of an access request, wherein each request profile includes:

"wherein the access control unit allows or rejects an access request in response to the access flag that is selected by the profile storage unit and wherein a write request that violates a write access flag is ignored and a read request that violates a read access flag results in a fixed answer and wherein a violation triggers an interrupt pin on the interface ".

The remaining dependent claims, not specifically mentioned, are allowed for the same rationale as the independent claim(s) being based from.

Response to Arguments

Applicant' remarks and amendment filed 6/4/10 and further amendments per Examiner amendment on 7/7/2010 in response to the last office action has been fully considered with the result that claims 15-20 are allowed as indicated above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc T. Doan whose telephone number is 571-272-4171. The examiner can normally be reached on M-F 8:00 AM 05:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sanjiv Shah can be reached on 571-272-4098.
